

MAMSYS

AI CAPABILITIES

From AI opportunity to enterprise impact — strategy, engineering,
automation and adoption.

**AI BUILT AROUND PEOPLE, PROCESSES & OUTCOMES
OUTCOMES**

STRICTLY CONFIDENTIAL

Who Is Mamsys

14+ years

DELIVERING ENTERPRISE SOLUTIONS

Founded in 2011, we've grown significantly while staying true to what defines Mamsys—experienced teams, close client collaboration and end-to-end accountability.

Global presence

UNITED STATES • EUROPE • INDIA

We combine local engagement with global delivery to support clients across regions and time zones.

Enterprise technology experts

TECHNOLOGY DEPTH

Expertise across ERP & SAP, Microsoft, cloud, applications, data, integration and modernisation, with strong technology delivery and AI capabilities.

7 industries

SECTORS SERVED

Healthcare, energy and utilities, manufacturing, financial services, medical devices, CPG retail, and legal and compliance.

3 models

DELIVERY OPTIONS

Onsite, offshore and hybrid teams — plus managed services for ongoing support after go-live.

95%+

REPEAT BUSINESS

Reflecting long-term client relationships, consistent execution, and continued trust in our Microsoft expertise.

The Foundation **We Built**

14+ years of deep technology expertise has shaped how we approach AI — with an understanding of the enterprise, its systems, data, processes and people.

- | | | |
|-----------|-----------------------------------|--|
| 01 | DEEP TECHNOLOGY EXPERIENCE | Enterprise expertise across ERP and SAP, Microsoft, cloud, applications, data, modernisation and integration — giving us a deep understanding of the technology landscape AI needs to work within. |
| 02 | AI SOLUTIONS BEYOND PILOTS | We move beyond experimentation to design, engineer and operationalise AI solutions that integrate with enterprise environments and scale beyond proof of concept. |
| 03 | PEOPLE & DELIVERY | Experienced technology, engineering and AI teams combine business understanding, technical depth and delivery discipline to take AI from opportunity to implementation and adoption. |
| 04 | AI PARTNER ECOSYSTEM | A strong ecosystem of specialised partners extends our capabilities and helps us bring the right expertise and technologies to each AI opportunity. |

WHAT WE DO · SECTION 03

Our AI Capabilities

From AI strategy to production — we design and build AI solutions that work across the enterprise.

AI CAPABILITIES

01 AI Strategy, Framework & Roadmap

Assess AI readiness, identify and prioritise high-value opportunities, define the AI strategy and build a practical roadmap from experimentation to enterprise adoption.

02 Generative AI & Knowledge

Enterprise RAG, knowledge assistants, intelligent search, document intelligence and AI applications grounded in enterprise data.

03 Copilots, Agents & AI Workflows

Role-based Copilots, AI agents and agentic workflows that augment people, orchestrate processes and automate multi-step work.

04 AI-Powered Engineering

AI-enabled software development, application modernisation, testing, documentation and engineering productivity using tools such as Codex, Claude and ChatGPT.

05 AI Integration & Automation

Connect AI with SAP, ERP, Microsoft, cloud, applications, APIs, data and enterprise workflows to embed intelligence into the flow of work.

AI ECOSYSTEM

MODELS & TOOLS

OpenAI · Claude · ChatGPT · Microsoft Copilot

FRAMEWORKS & ENGINEERING

LangChain · Codex · AI development frameworks

ENTERPRISE AI ECOSYSTEM

Noah.ai · GoTrust · Diseque · Sapience

Technology-agnostic. Enterprise-focused. Outcome-led.

Proof In Delivery

AI in production — claims analytics, AI-driven modernisation and agentic AI applications.

AI & AUTOMATION · CLAIMS ANALYTICS

AI For Claims Analytics In Insurance

✓ Reduce claims resolution effort & improve dispute outcomes

An AI-powered claims analytics system for legal document analysis and extraction, automated tracking of arbitration cases, and machine learning models that classify documents and identify issues in claims.

Faster claim resolutions · Higher success rates in disputes · Efficient legal document review

LEGACY APPLICATION MODERNISATION

AI-Driven Modernisation Of A Coating Application

✓ Improve production quality & detect deviations faster

An AI-driven coating application fully integrated with SAP: automated sample analysis flags deviations early, sensor data optimises production runs with predictive maintenance, and Power BI delivers real-time QA reporting.

Streamlined production orders · Real-time sensor data · AI-driven process optimisation

GENERATIVE AI · AGENTIC WORKFLOWS

LangChain AI Buddy For Personal Finance

✓ Deliver personalised financial guidance through agentic AI

A LangChain-based AI Buddy that reasons over real user financial data and life stage, orchestrates multi-step queries across 30+ internal tool agents, and keeps a human in the loop — AI suggests, the user decides.

30+ orchestrated tool agents · Journey-aware guidance · Human-in-loop by design

What Makes Our **AI** Different

AI BUILD AROUND PEOPLE, PROCESSES AND OUTCOME

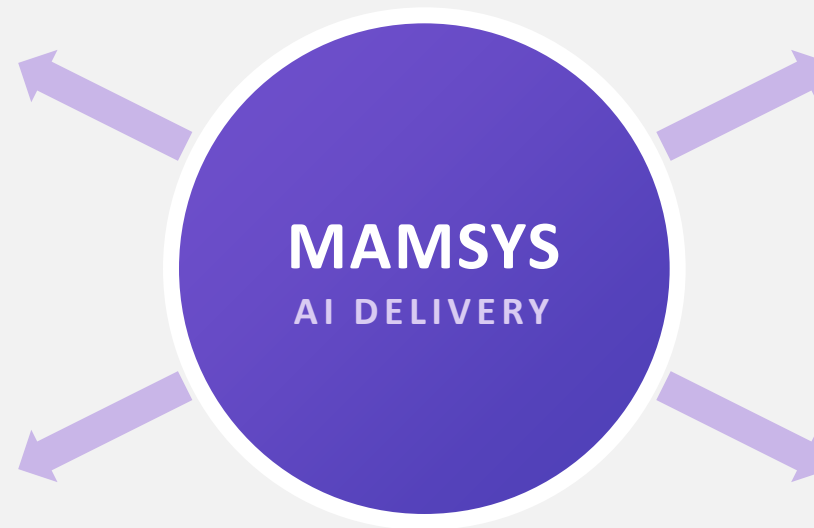

BUSINESS-FIRST AI

We start with the business problem, opportunity and value — not the technology.

TECHNOLOGY-AGNOSTIC

We select the right models, platforms, frameworks and tools for the problem rather than forcing every use case onto one technology stack.

OUTCOME-LED ENGINEERING

We design AI around measurable outcomes such as productivity, efficiency, experience, revenue and growth.

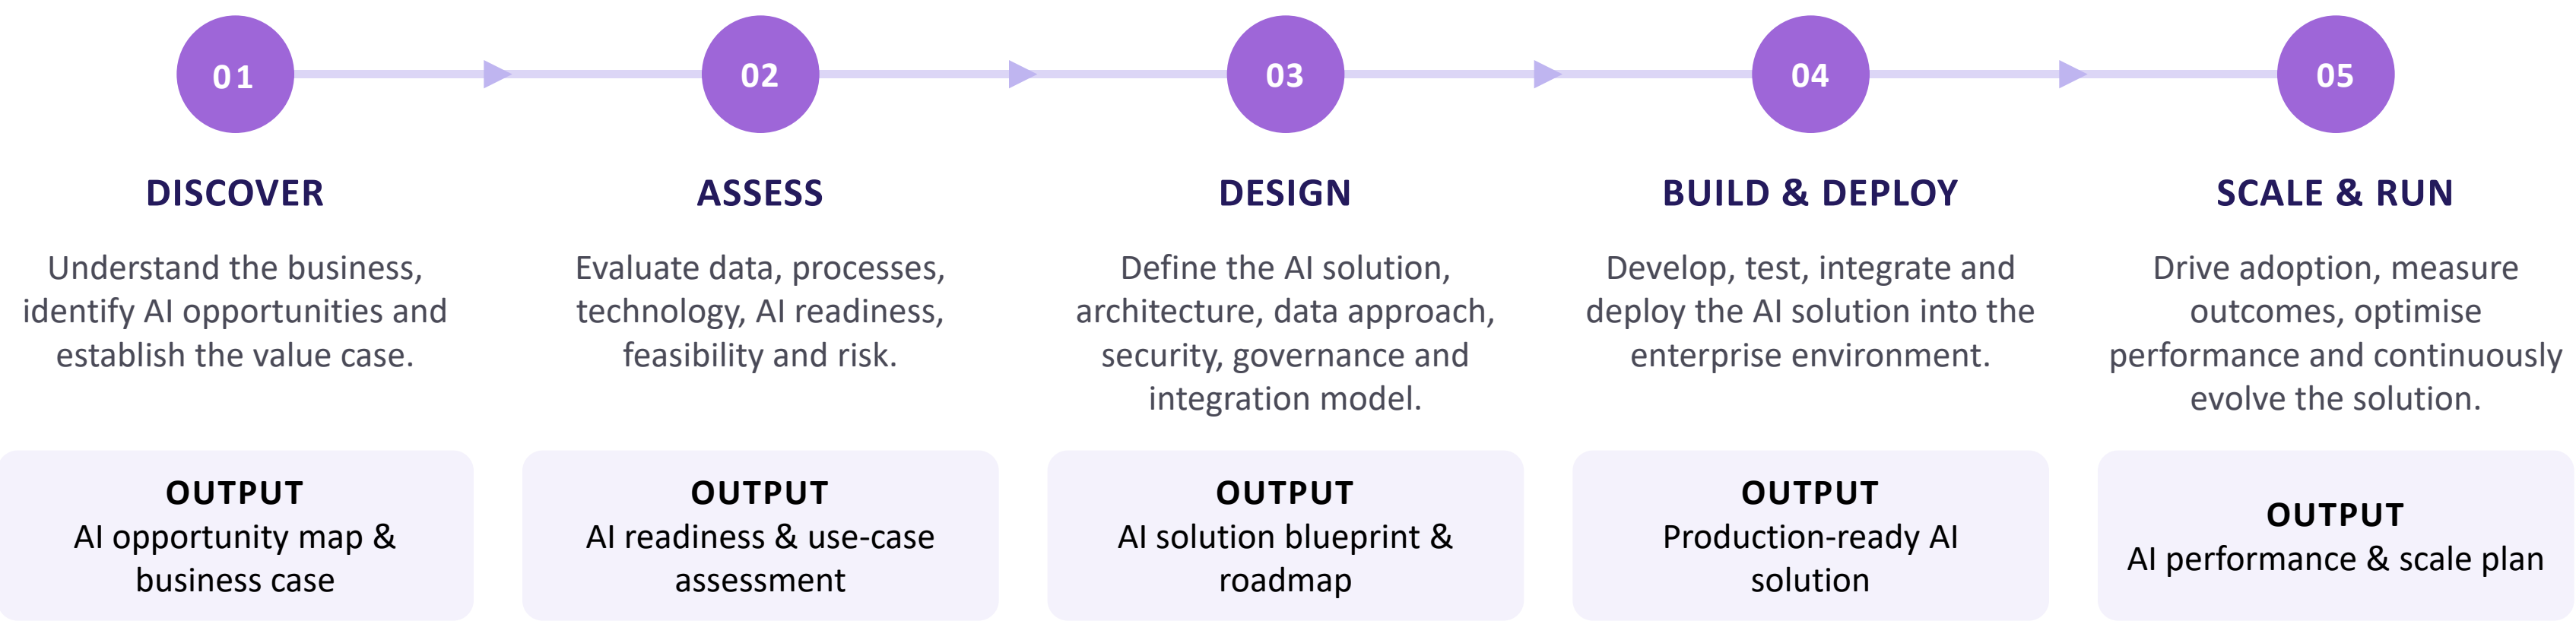

ENTERPRISE-READY BY DESIGN

Security, governance, data privacy, integration and human oversight are considered from the outset — not added after the pilot.

Mankind × Machine Systems — intelligence amplified, not replaced.

How We Deliver AI

From AI opportunity to production, adoption and measurable business impact.

EMBEDDED ACROSS EVERY PHASE
AI GOVERNANCE · SECURITY · DATA PRIVACY · RESPONSIBLE AI · HUMAN OVERSIGHT

Trusted To Deliver at Enterprise Scale

Our customers trust us for delivering scalable, reliable, and secure solutions across their business landscape.

- Proven delivery excellence
- High customer satisfaction and repeat engagement
- Scalable offshore teams supporting global operations

THANK YOU!

We design AI to work alongside people — taking on repetitive work, surfacing insights and accelerating execution, while people remain at the centre of judgement, creativity and decision-making.

Let's Find Your AI Advantage Together

AI Strategy · Generative AI · Copilots · Agents · AI Workflows · AI Engineering
